EDUCATION

A. P. Shah Institute of Technology (APSIT)

Bachelor of Engineering in Computer Science and Engineering (A.I. & M.L)

Thane, Maharashtra

Nov 2022 - Present

EXPERIENCE

Technical Intern | Team FullStack

Jun 2025 – Sep 2025

- Worked on Eterniq, an AI code assistant web app with browser-based audio-video screen sharing.
- Optimized Docker Image size by 90%, cut build times by 93% via multi-stage builds and dependency pruning.
- Improved web-search functionality of the chatbot reducing response times by 83% using SerpAPI.

PROJECTS

Beaker | Go

June 2025 – Sep 2025

- Built a custom HTTP web server from scratch, implementing TCP socket programming, protocol parsing, and static file serving
- Designed and implemented request handling and routing system, supporting both static content delivery and API endpoints
- Optimized concurrency with threads and workers to manage multiple client connections

MedVision AI | Python, TensorFlow, Flask, Grad-CAM

Feb 2025 – Mar 2025

- Developed a hackathon-winning medical application for detecting medical ailments
- Trained CNNs to classify different types of brain tumors, incorporating Grad-CAM for tumor region visualization and localization
- Built a lung condition classifier to detect COVID-19, pneumonia, and normal cases using chest X-ray images
- Designed a Flask-based web interface for image uploads, prediction results, and interpretable visual explanations

CampusSwap | Python, Django, Vue.js, PostgreSQL

Jan 2024 – Mar 2024

- Created an online platform enabling students to sell their used goods to peers at competitive prices
- Implemented a full-stack web application using Django for the backend and Vue.js for the frontend
- Incorporated secure user authentication and authorization to guarantee safe transactions
- Utilized PostgreSQL for reliable and efficient database management and data operations

TECHNICAL SKILLS

Languages: Python, Go, JavaScript, Java, HTML, CSS

Databases: PostgreSQL, MongoDB

Frameworks: Django, React, Flask, Vue, Node.js

Developer Tools: Git, Github, Docker, Bash, Linux

EXTRACURRICULAR

APSIT AIML Club | Member & Ambassador

July 2024 – Present

- Conducted hands-on workshops on various A.I & M.L concepts

Exalt (APSIT TechFest) | Participant

Jan 2023

- Created an light sensing circuit with LDR to control and play the Chrome Dino game, and presented it in a project competition

Elocution Competition | Winner

May 2023

- Won first place by delivering a speech on suffering and rationality
